

SMART Token, SMART Rewards, SMART Ecoverse, SMART Money

BaltiCrypto is the world's most profitable decentralised, SMART sustainable Ecoverse, powered by blockchain technology and Backed by real Assets.

BaltiCrypto is a revolution in blockchain technology, a vertically integrated & pioneering enterprise focusing on realising the true potential of this game-changing tech, from crypto mining, to tailored wealth education solutions, as well as effective, targeted foundations addressing real problems ethically and transparently.

Our mission is to enrich the lives of contributors and make this world a better place.

BaltiCrypto Ecoverse

The BaltiCrypto Ecoverse is a successful arrangement of different ecologically sustainable elements that leverage off each other to create an extraordinary positive impact on the world, while also enhancing the quality of the lives of everyone who contributes to BaltiCrypto, and participates in the Ecoverse.

Diversification and evolution are the hallmarks of the Ecoverse, but in our universe the forces of evolution are you, the contributors. This is a space for personal and group development, for innovative thinking and incubation of revolutionary ideas, as well as a one-stop shop for tracking token values, mining performance & rewards and in general help to reduce the overall carbon footprint.

Like the cells in a beehive, the activity in one area of the Ecoverse supports all the other areas around it, creating a self-supporting system.

The 6 cells at the heart of the BaltiCrypto Ecoverse are:

-  Green Cryptocurrency Mining
-  SMART Hybrid Reward Token
-  Future-focused Education
-  Renewable Energy Production & Research
-  SMART Impact Foundation
-  Crypto Exchange & Trading Platform

Green Cryptocurrency Mining

BaltiCrypto's is the world most profitable and SMART green energy cryptocurrency mining farm. Our aim is to create the most energy efficient, sustainable, environmentally friendly mining farm in the world, using 100% renewable energy for mining operations. We see this goal as eminently achievable through ingenuity, innovation, first adoption of new technologies and creation of industry-leading software solutions, and intelligent production and use of renewable energy.

SMART Hybrid Reward Token

BaltiCrypto SMART Hybrid Reward Token (BCT) is a cryptocurrency **backed by BaltiCrypto's Ecoverse**. BCT is **multifunctional token** providing more benefits and options than usually offered by traditional utility or security tokens.

Its **unique SMART Hybrid features** allow BCT holders to:

Receive ongoing rewards from the BaltiCrypto's Ecoverse (from mining and other ventures)

Acquire products, services and educational programs from the platform

Trade on public exchange

Participate in creating a positive impact on our planet

Polling for development, research, endowment, impact and faculty decisions

Withdraw funds using the BaltiCrypto Debit Card, which can facilitate purchases of everyday goods and services from both online and regular shops, direct from your BCT wallet

The BaltiCrypto SMART Hybrid Reward Token - Unique Features, Real Rewards

BaltiCrypto Reward Distribution:

SMART Reward Pool - **60%** of the rewards received through **mining operations** will be distributed between BCT holders.

SMART Reward Center - **20%** Rewards received through **all other** BaltiCrypto Ecoverse projects will be distributed between BCT holders.

Mining reinvestment - Depending on the year up to **40%** of the mining rewards will be reinvested for upgrading and expansion of the mining farm.

Ecoverse reinvestment - Depending on the year up to **30%** of the mining rewards will be used for developing and improving BaltiCrypto Ecoverse projects.

All rewards will be paid out in **ETH**.

Renewable Energy

“**Bitcoin already consumes 0.15% of the world's energy.**”

Renewable energy is a one of the core elements of BaltiCrypto's Ecoverse which contributes to the project being as energy efficient, cost effective and sustainable as possible, while creating a positive impact on our planet as well as rapidly reducing carbon footprint.

Our plan is to expand production at our renewable energy parks (solar and wind power sources), as well as sourcing and developing newer and better technologies to maintain 100% green energy use as our scope and reach expand. Our aim is not only to make our Ecoverse 100% green but also participate in various renewable energy projects in Estonia and globally.

Future Focused Education

As blockchain technology inevitably emerges as the future of money and information transfer, the need for people the world over to familiarise themselves with this new paradigm will increase in lockstep. For many, the seemingly complicated nature of something that is inherently digital and abstract may seem too much to grasp. However, the risks of not doing so are far too great to ignore. In the first instance, these people will miss the wave, the opportunity to get in at the ground floor and establish their presence in the crypto space, and reap the incredible rewards which are available. In the long term, these people will only fall further behind, as their lack of familiarity in an entirely new monetary ecosystem sees them struggle to find their way. Many will be surprised at the rapidity with which this takes place.

We at BaltiCrypto see our responsibility in carrying our contributors into this new era, as paramount. Whilst our operations in mining, green energy, and diversified, evolved commercial interests will serve contributors through ongoing rewards, we believe it is through focused, practical guidance and instruction that we will truly help contributors find their place in the new system. BaltiCrypto University will be a ground-breaking resource for the development of both systems and talent for blockchain technology. Starting as an online education resource, before expanding to a physical campus offering courses in a wide range of subjects, the University will be a new standard for education and dissemination of information about crypto mining, as well as a home for those who wish to develop their talents, and use their skills in service of humanity.

SMART Impact Foundation

It is the vision of the BaltiCrypto team to be able to serve others in need by creating targeted foundations which are self-sustaining, focused and effective. We believe that we can not only make real difference in the world, but also show a way beyond charity that relies on donations and vague estimates of expenditure.

Introducing BaltiCrypto's decentralized and self-sufficient SMART Impact Foundation, powered by blockchain technology. Now, through the power of blockchain, all contributors can see accurate, real-time figures of rewards earned and spent by the foundation, and help to choose the areas that BaltiCrypto will be focusing its efforts.

Crypto Exchange and Trading Platform

BaltiCrypto Ecoverse acts like a SMART village, the contributors its citizens, and each part of the whole contributing, and benefiting from the contribution of the other parts. One way in which we can increase this sense of belonging, is through the establishment of the BaltiCrypto Exchange.

Initially, contributors will need to take their tokens out of the platform if they wish to place them on public exchanges and trade them. In the near future, however, BaltiCrypto will launch its own public exchange platform, to both simplify trading for token holders, as well as allow them to list their tokens without having to remove them from the platform.

The Crypto Trading Academy will form part of the Ecoverse via the University. The goal will be to train contributors to accurately read the market, as well as training for advanced programmers in creating their own Bots. In addition to this, we will offer manual and robo crypto trading services, where our highly-developed, proprietary algorithms, will take the hard work out of reading a sometimes volatile market.

Additionally, the fact that we will be able to charge exchange fees will mean further revenue going in to the SMART Reward Centre, effectively offsetting the transaction costs users would otherwise pay to third party exchanges.

ICO Details

Total BaltiCrypto Tokens Supply: **400,000,000 BCT**

Total Tokens Available during ICO rounds: **280,000,000 BCT**;

28,000,000 BCT will be offered as Affiliate bonus;

In addition, **4,000,000 BCT** will be offered as Bounty Tokens.

Initial token price rate* :

Token distribution:

-  ICO - 70% (280 million)
-  Affiliate bonus - 7% (28 million)
-  Team - 6% (24 million)
-  Company - 10% (40 million)
-  Partners - 4% (16 million)
-  SMART Foundation - 2% (8 million)
-  Bounty Program - 1% (4 million)

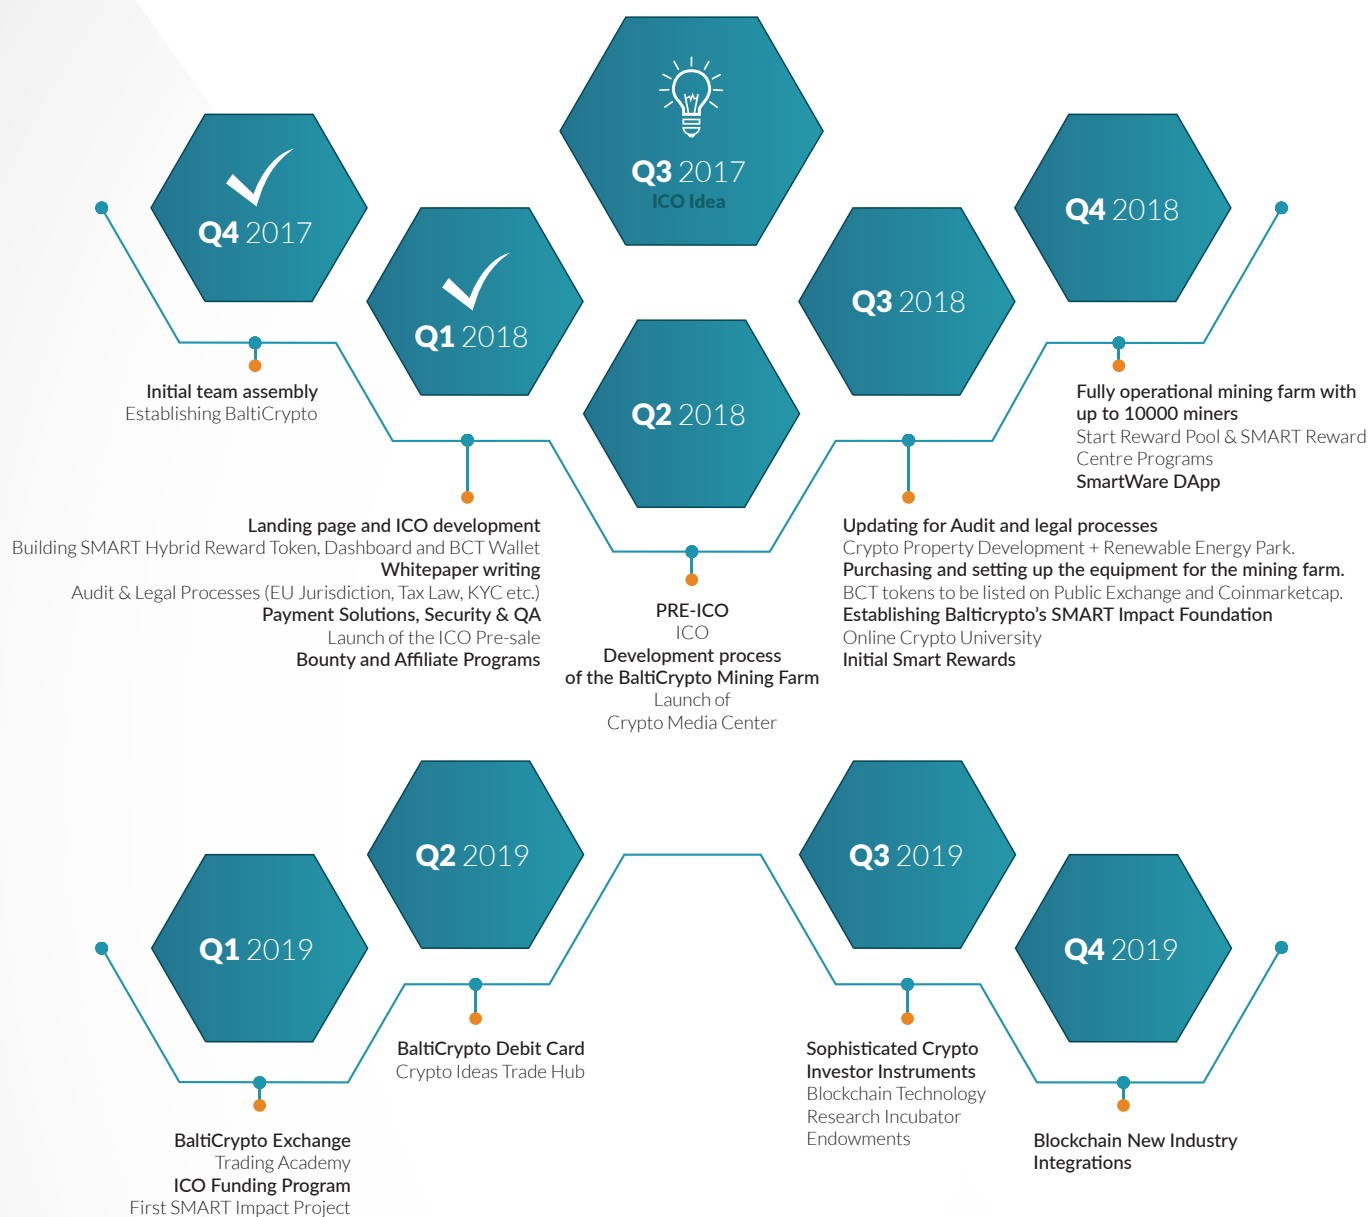

ICO details and 100% funds usage:

-  **70% Sustainable Cryptocurrency Mining Farm** (Property, Warehouses, Green Energy, Software development, Hardware and infrastructure).
-  **12% Ecoverse Projects**
-  **8% Enterprise** (Administration, Legal costs for ICO, Operational, Overheads, Security, Research, Development, Marketing, Insurance).
-  **6% Founding Members** (Early investors, Advisors, Team)
-  **4% General Reserve** (Unforeseen expenses)

Roadmap

Team

Raido Lensment
CEO/Project Manager/Co-Founder

Andrus Sabiin
**Co-Founder/Business Developer/
Financial Advisor**

Kris Gaunt
**Co-Founder/Ideas Architect/Lead
Developer**

Indrek Press
COO/Co-Founder

Kristel King
Asia Consultant
